

BalanceBox® 400 and 650
for touchscreens

Thomas Regout International B.V. offers a broad range of linear motion solutions that help move your application in any direction: horizontal, vertical and diagonal.

Challenge us, in any way. Based on its 180 years' experience in linear motion solutions, Thomas Regout International B.V. offers a range of high quality products for use with large touchscreen displays and interactive whiteboard systems. In our challenge to offer you a comfortable and intuitive solution to adjust your screen vertically, we have developed the BalanceBox®, a user-friendly, ergonomic, high-quality, reliable and sustainable product that allows you to move your screen up and down, and even tilt, in a manual way.

BalanceBox® 400 and BalanceBox® 650

The BalanceBox® is the perfect solution to move your touchscreen up and down. BalanceBox® 400 and BalanceBox® 650 offer a partially overlapping weight range giving the installer the choice between a travel of 400 mm (15.75 inch) and 650 mm (25.6 inch). The BalanceBox® 400 has a weight capacity up to 90 kilo's (198 lbs) total in a compact and stylish stainless steel design that is hidden behind the screen. The BalanceBox® 650 offers a weight capacity up to 180 kg (396 lbs) for very large displays or multiple display arrays. Interface brackets for all screen sizes, a floor support and a mobile frame are available as accessories.
